## Understanding Your Invoice.

Keep these definitions in mind as you review your charges. If you have any questions, do not hesitate to call your **Customer Solutions Representative**.

**Energy at fixed price:** The contract quantity multiplied by your fixed contract price for the billing period.

**Energy at market price:** The consumption quantity consumed multiplied by the market price for the billing period.

**Energy bought/sold at market price:** The total purchased volume of energy consumed above your fixed contract quantity multiplied by the market price, plus your total sold volume of unused contract quantity multiplied by the market price.

**Interest Charges:** The interest rate applied to outstanding balances per your contract terms and conditions.

### Market Price:

**Electricity:** The Alberta Hourly Power Pool Price, which is the actual hourly price of electricity as published by the AESO, found at <http://ets.aeso.ca/>

**Natural Gas:** The AECO 'C' Daily Index, which is, for each Day, the price in Canadian Dollars per GJ equal to the average price in Canadian Dollars per GJ published on the "Canadian Domestic Gas Price Report".

**Carbon Tax:** Federal or Provincial tax based on the consumption of natural gas. For additional information, please visit the Climate Change section of [Canada.ca](http://Canada.ca) or call 1-800-668-6767

**Prior Period Adjustments / Other Charges:** Includes adjustments for Initial and Final Settlement, TransAlta Fee and any other adjustments and charges.

**Line losses:** Is a settlement amount of energy allocated to meters at a fixed rate. Line Losses is energy lost when transporting and converting energy from the high voltage used on the grid to the lower voltage used at a meter.

**Trading charge:** A per MWh/or GJ charge on all energy purchased and sold through the power pool.

**Unaccounted for energy (UFE):** Is a settlement amount allocated to meters and represents energy not accounted for by meters and losses. UFE is calculated hourly by the Load Settlement Agent for each area and the amount is distributed evenly to all meters for that hour.

**Retailer Adjustment to Market Debit/Credit or "RAM":** Is the billing method by which money is collected from all affected parties to pay for claims, in response to billing errors that occurred after Final Settlement.

**Adjustment to load on margin (ALM):** Is a mechanism that adjusts customer charges for intra hour adjustments. It is the difference between the bid price and the pool price multiplied by the volume of energy consumed for the dispatched period.

**Uplift Charges:** Is the result of an AESO dispatch of energy for a source asset. The uplift charges are calculated by the AESO based on a set formula.

**Wire Service Provider Charges & Distributor Delivery Charges:** Your total cost of flow-through distribution and transmission (electricity) or delivery (natural gas) charges including: demand, riders and fees; for the billing period.

**Local Access/Franchise Fee:** Is collected on behalf of the local government to access municipal land to construct, maintain and operate distribution systems serving your area.

## Ways to pay your bill

### By PAD (Pre-authorized Debit Withdrawal)

Contact us to arrange for automatic withdrawal of future payments

### By APA (Counter Payment)

Payment at your preferred financial institution - please include the remittance portion

### By EFT - Electronic Funds Transfer

Contact your preferred financial institution for this set-up option

### By Mail

TransAlta accepts payments via mail - please include the remittance portion along with your payment

### By Internet or Phone Banking

Contact your preferred financial institution for this set-up option
